

// We continue to invest in innovative, world-class supply chain solutions //

Artificial Intelligence (AI)

Eddie Stobart is embracing the most advanced self-learning AI technologies to further drive operational efficiency and continuous service improvement.

Big Data & Analytics

We capture unprecedented volumes of data in the course of our daily operations and use world-class analytics tools & techniques to deliver unique, previously illusive insights.

Internet of Things (IoT)

In today's connected world, real-time service is a prerequisite. We have an extensive ecosystem of connected systems, assets and devices, delivering new insights into our customer operations.

Fully integrated supply chain solutions

Algorithmic Optimisation

We're deploying world-leading optimisation software which uses unique constraint-based planning algorithms and techniques to deliver service and operational efficiency across the network.

Cloud Based Deployments

Use of the latest private and public cloud hosted services is allowing us to deliver very high availability, scalability and cost-effective customer solutions.

Automation & Robotics

We're working with some of the leading providers of automation and robotics technologies to support our advanced warehousing and fulfilment operations.
